Waterjet Cutting

Zero Thrust Dyna Gun (for underwater applications)

- The Zero Thrust Gun is used for **underwater cleaning of barnacles and marine growth, paint scale, rust from ships, offshore structures** and a variety of other underwater cleaning applications.
- Incorporates a baffled covered reverse thrust with an adjustable balancing device that will offset the forward thrust and balance the jet thrust when the gun is in use.
- Constructed to be lightweight and compact with a vertical hose connection for easy underwater handling.
- Like all AQUA-DYNE hand guns, this model has a trigger guard and safety lock to prevent accidental engagement of the trigger.
- Water pressure is reduced to a minimum upon releasing the trigger.
- Weight is approx. 21 lbs. (Includes 8' whip hose with shroud) with an approx. length of 71".
- **Self-Spinning Rotary Cleaning Head** for underwater applications available (optional item). 3" Cleaning Path. Contact Aqua-Dyne for details.

NOTE: Equipped with QC1, Quick Change Piston Seal Assembly.
